1. INTRODUCTION

The development of Muskrat Falls¹ on the lower Churchill River in Labrador will provide a clean, renewable source of electricity to meet Newfoundland and Labrador's growing energy demands. Its development will provide homes and businesses with stable electricity rates well into the future, and will be a valuable power-producing asset for more than 100 years.

The development of the Muskrat Falls Project represents the first phase of development on the lower Churchill River. The development in Newfoundland and Labrador includes:

- Muskrat Falls Hydroelectric Generating Facility, an 824 megawatt (MW) hydroelectric generating facility consisting of two dams and a powerhouse at Muskrat Falls in Labrador.
- Labrador-Island Transmission Link, a 1,100 km High Voltage direct current (HVdc) transmission line from Muskrat Falls to Soldiers Pond on the Avalon Peninsula, including a 35 km subsea cable across the Strait of Belle Isle.
- Labrador Transmission Assets, two 250 km High Voltage alternating current (HVac) transmission lines between Muskrat Falls and Churchill Falls in Labrador.

The Government of Newfoundland and Labrador sanctioned the development of the Muskrat Falls Project in December 2012. Construction is expected to take six years to complete.

The Lower Churchill Management Corporation (LCP)² was established to manage the construction of the Muskrat Falls Project as described above.

The following report outlines initiatives that support compliance of the Lower Churchill Projects Benefits Strategy as agreed to by LCP and the Province of Newfoundland and Labrador.

2. EMPLOYMENT

The following is the employment information for the projects for the quarter July 1 to September 30 (Q3 2015). Detailed employment information and statistics are outlined each month in the Muskrat Falls Project monthly report. These reports are available online at muskratfalls.nalcoreenergy.com.

- In the third quarter of 2015, nearly 2.8 million hours were worked by 6,334 individuals on the project.
- 2.32 million hours (83% of the total) were worked by 5,272 residents of the province.

3. GENDER EQUITY AND DIVERSITY

LCP is committed to implementing a Gender Equity and Diversity Program for the project. It is LCP's goal that Muskrat Falls will be a model project demonstrating innovation and creativity in developing and implementing best practices in gender equity and diversity. Through its own diversity program, and through its management of the hydroelectric projects in its mandate, Nalcor seeks to position positively the creation and ongoing support of a respectful, inclusive and diverse work culture as a desirable business practice. LCP believes its Gender Equity and Diversity Program will also contribute to workplace safety through increased collaboration and respect, which is a priority for Nalcor and one of its corporate goals.

LCP has highlighted some of the gender equity and diversity activities that were undertaken during the quarter. A detailed breakdown of LCP's gender equity and diversity commitments and initiatives that are planned and/or underway by the project is available in Appendix A of this report.

Promoting Women in Trades

At the end of Q3, 640 women were working on all project components, comprising about 12 per cent of the total workforce. Of these, 359 were working in construction, 16 in engineering, 101 in project management, and 164 in project support. Of the 640 women working on the project, 589 of these women are Newfoundland and Labrador residents and 36 were apprentices.

During the quarter, LCP continued to work with Women in Resource Development Corporation (WRDC) where this agency continues to provide practical support to women in the province who wish to pursue employment in the construction sector.

Gender Equity and Diversity Initiatives

The Gender Climate Survey was conducted at the Muskrat Falls Generation site in Q3 of this year. The survey will continue to be rolled out at other LCP work locations throughout 2015/2016.

Labrador Aboriginal Training Partnership (LATP) Support

The LATP continued to offer client counseling throughout the quarter to Aboriginal individuals seeking employment, as well as providing ongoing funding for safety certifications.

During the month of August, LATP launched a Powerline Technician training program at the College of the North Atlantic in Happy Valley-Goose Bay. Twelve students began the nine-month pre-apprenticeship program and the program is still ongoing.

Additionally, the LATP surpassed its employment targets set out by the federal/provincial funding contribution agreement for the one year extension of the Skills and Partnership Fund (SPF) project in September. For the fiscal year between April 1, 2015 and March 31, 2016, the target was 60 employed on the Muskrat Falls Project. During September, that number reached 80 and has continued to climb.

Labrador Innu Initiatives

Nalcor representatives met with Innu Nation on July 8, 2015, to discuss a variety of IBA implementation issues. This included a review of IBA scholarship applications, Innu employment and on-the-job training.

On July 9, 2015, Nalcor facilitated a meeting between Innu Nation and Andritz Hydro to discuss IBA implementation commitments relevant to contractors.

In August, meetings were held between senior leadership of Nalcor and Innu Nation to foster greater communications on workplace respect and other IBA-related concerns. As a result of these meetings, a number of measures are being taken to promote a respectful workplace for all workers.

On September 17, the joint Nalcor-Innu Nation Tshiashkueish Committee met to discuss various IBA implementation items. Decisions were made on IBA scholarships to be awarded to four Innu postsecondary students.

On September 23, Stantec's archaeologist made a presentation at the Innu Community Gathering at Gull Island. He talked about historic and pre-historic artifacts found at Lower Churchill Project sites in Labrador and sample artifacts were displayed. A Contractor Summit was held at the Muskrat Falls site on September 30 for senior management of primary contractors. Hosted by Nalcor CEO Ed Martin, the Summit reviewed key IBA obligations for contractors and included a presentation on Innu Cultural Awareness which provided an overview of Innu history, culture and current social issues. Anastasia Qupee, Grand Chief of Innu Nation also made a presentation on issues of key importance to Innu Nation, including Innu employment and subcontracting opportunities.
