

January 16, 2020

Earlier today, we observed a landslide on the north side of the lower Churchill River about 750 metres downstream of the Muskrat Falls facility.

There is no cause for concern as landslides on the banks of the river are common natural occurrences. We expect landslides to occur from time to time in the future as they have in the past.

This landslide has no impact on our facility and there is no risk to the safety of the public.
